Profile

In my year of studying IT I have a talent, for building websites and applications from the ground up handling both the design and technical aspects. Now I'm delving into Java application development excited to enhance my abilities more. Apart from coding I have an interest in entrepreneurship and startups on the lookout for fresh concepts and chances to grow. With a talent for solving problems and a passion for creativity I'm geared up to bring about changes, in both the tech industry and startup environment.
